

INGREDIENTS

DECLARATION OF MAIN INGREDIENTS

A

ALLANTOIN

INCI: ALLANTOIN

Is considered to have wound healing, skin-smoothing and cell regenerating properties. The stratum corneum softening effect loosens dead skin cells and supports drainage of sebum. Stimulates cell regeneration and soothes irritated skin.

ALOE-VERA

INCI: ALOE BARBADENSIS LEAF

Aloe-Barbadens is obtained from aloe-vera plant leaf, is rich in amino acids, enzymes and various mineral salts. It's moisturizing, wound healing and anti-inflammatory qualities make it ideal for soothing skin irritations. Supports self-restoration of sun damaged skin cells.

ARGANOIL

INCI: ARGANIA SPINOSA OIL

Argan oil is a plant oil produced from the kernels of the argan tree (*Argania spinosa* L.) in Morocco. This high-quality ingredient has an exceptionally high content of the antioxidant vitamin E. The moisturizing effect prevents dehydration and premature skin aging. It soothes damaged and sensitive skin.

AVOCADOOIL

INCI: PERSEA GRATISSIMA (AVOCADO) OIL

Cold-pressed oil derived from the avocado fruit with a very high proportion of unsaturated fatty acids, Vitamin A, B, D, E and lecithin and phyto-sterols. Clinical studies have shown that avocado oil is more readily absorbed than most other oils. It's unsaponifiable components make this oil very well tolerated. The natural oil is yellowish to red and effortlessly applied (spreads easily). Absorbs fast and seals in moisture. Wonderfully smoothing.

B

BETAINE - SUGAR BEET EXTRACT

INCI: BETAINE

A polysaccharide compound obtained from sugar beet juice with an exceptional water-binding capacity. Improves the overall skin feel. An excellent anti-aging product that moisturizes, nourishes and protects against mechanical and chemical skin damage.

DECLARATION OF MAIN INGREDIENTS

BEAUTIFEYE™

INCI: GLYCERIN, ALBIZIA JULIBRISSIN BARK EXTRACT AND DARUTOSIDE

Distinguished with the "Best New Ingredient Award Asia 2013" the Phytoextrakt Beautifeye™ particularly tightens the upper eyelid as a non-invasive alternative lifting option, it reduces caltrops, dark circles and swellings.

C

CALENDULA

INCI: CALENDULA OFFICINALIS EXTRACT / CALENDULA OFFICINALIS FLOWERS / CALENDULA OFFICINALIS OIL

Calendula extract is obtained from the oil and extract of the calendula flower that is wound healing, anti-inflammatory and very calming. Provides soothing for dry, rough and very sensitive skin.

CAMPHOR

INCI: CAMPHOR

Acts antiviral, antiseptic, stimulating, bactericidal, blood circulation enhancing and anti-inflammatory.

CASTOR OIL

INCI: HYDROGENATED CASTOR OIL

Externally, castor oil is mainly used to treat skin scales, scars and age spots. It penetrates well into the intercellular spaces as in callused skin. The oil forms a mechanical protective film against water and water soluble pollutants and helps heal very dry skin.

CELLIGENT

INCI: ETHYLFERULAT, ROSMARINUS OFFICINALIS LEAF, DISODIUM URIDINE PHOSPHATE

Celligent is a natural antioxidant with UV absorbing properties. Neutralizing the oxygen radicals caused by UV radiation, it provides effective cellular and DNA protection against sunlight and the resulting oxidative stress. Promotes accelerated skin regeneration.

DECLARATION OF MAIN INGREDIENTS

CHAMOMILES EXTRACT

INCI: ANTHEMIS NOBILIS EXTRACT

A distinction is made between matricaria chamomilla (the so-called “real” chamomile) and anthemis nobilis (roman chamomile). The oil obtained from the flower heads of chamomile contains as main ingredients bisabolol, responsible for the blue color chamazulen. Oil and extracts of roman chamomile have anti-inflammatory and antiseptic properties.

CHITOSAN

INCI: CHITOSAN

Maintains the moisture balance of the skin.

CITRIC

INCI: CITRIC ACID

Citric acid occurs naturally in citrus fruits and belongs to the group fruit acids. Citric acid acts especially astringent and toning, supporting the healing process. The antiseptic effect is particularly effective against blemished skin. Due to the relative weak acidic properties, citric acid is also effective against fungal infestation.

COLLAGENEER

INCI: HELIANTHUS ANNUUSS (SUNFLOWER) & LUPINUS ALBUS SEED EXTRACT

Promotes the formation of type I collagen, helps prevents collagenosis and stimulates collagen synthesis. Tightens facial contours and promotes elasticity.

CUCUMBER EXTRACT

INCI: CUCUMIS SATIVUS EXTRACT

Moisturizes and tones, giving a soft and smooth appearance. Cucumber extract is known for its refreshing, invigorating and decongestant qualities. In addition, the extract has a pore-refining effect.

CUPUAÇUBUTTER

INCI: THEOBROMA GRANDIFLORUM SEED BUTTER

Found in the Amazon region of the Brazilian rainforest on a tree belonging to the cocoa plant family. The cupuaçu seed’s high content of essential fatty acids makes the butter so valuable for skin care. It strengthens the natural barrier function and reduces skin dehydration. The astonishing 240% water binding capacity provides outstanding emulsifying

DECLARATION OF MAIN INGREDIENTS

properties. The phytosterol content supports the regeneration of the skin barrier and is considered to soothe the skin and reduce redness.

D

DEFENSIL[®]

INCI: OCTYLDODECANOL, ECHIUM PLANTAGINEUM SEED OIL, HELIANTHUS ANNUUS SEED OIL, CARDIOSPERMUM HALICACABUM FLOWER/LEAF/VINE EXTRACT

Phytosterols from the balloon vine (cardiospermum halicacabum) prevents skin irritation and inflammation. The essential fatty acids of the Echium-extract (Echium plantagineum) protect and strengthen the skin barrier. Excerpts from sunflower oil are rich in skin-related phytosterols and vitamin E.

DEFENSIL PLUS[®]

INCI: OCTYLDODECANOL, RIBES NIGRUM, SEED OIL, HELIANTHUS ANNUUS SEED OIL UNSAPONIFIABLES, CARDIOSPERMUM HALICACABUM FLOWER / LEAF / VINE EXTRACT, TOCOPHEROL, HELIANTHUS ANNUUS SEED OIL, ROSMARINUS OFFICINALIS LEAF EXTRACT

Phytosterols from the balloon vine (cardiospermum halicacabum) prevents skin irritation and inflammation. The essential fatty acids of the Echium-extract (Echium plantagineum) protect and strengthen the skin barrier. Excerpts from sunflower oil are rich in skin-related phytosterols and vitamin E.

DERMAXYL

INCI: CERAMIDE 2, PALMITOYL OLIGOPEPTIDE

Dermaxyl is a highly effective biotechnologically produced active ingredient. It stimulates cell communication, skin renewal and promotes natural repair mechanisms. A gentle impulse stimulates the formation of collagen and elastin, resulting in tighter and firmer facial contours. It also strengthens the barrier function of the skin and improves its protective mechanisms.

DESARON[®]

INCI: COMPOSED OF: DESAMIDO COLLAGEN, SODIUM HYALURONATE

Excellent hydrating effect and outstanding water binding capacity. Improves skin smoothness and elasticity.

DECLARATION OF MAIN INGREDIENTS

E

EGF – EPIDERMAL GROWTH FACTOR

INCI: HUMAN OLIGOPEPTIDE-1

Acts especially skin smoothing and nourishing. Stimulates and accelerates cell division.

G

GINSENG

INCI: PANAX GINSENG ROOT EXTRACT

Leaves skin supple and is helpful against harmful effects due to external influences.

Promotes blood circulation and revitalizes.

GLYCOLIC ACID

INCI: GLYCOLIC ACID

Glycolic acid is an ingredient found naturally in sugar cane juice from the sugar cane plant and belongs to the group of alpha-hydroxy acids. Glycolic acid provides multiple benefits in cosmetic products: It dissolves keratinized skin cells by softening the adhesive cell structures in the horny layer. Skin regeneration is stimulated and lines and wrinkles can be reduced. The skin texture is refined, with a clearer complexion, increased moisture retention and elasticity.

GUAR GUM

INCI: GUAR HYDROXYPROPYL

Emulsifier.

H

HAMAMELIS

INCI: HAMAMELIS VIRGINIANA EXTRACT

Hamamelis, also known as witch hazel, is an extracted from leaves of the hamamelis virginiana bush containing hamameli-tannins and essential oils. Tannins have an astringent and toning effect.

DECLARATION OF MAIN INGREDIENTS

HEMP OIL

INCI: CANNABIS SATIVA SEED OIL

Intensively nourishing and soothing. Smooths and softens the skin.

HONEY

INCI: MEL (HONEY EXTRACT)

Characterized by a great compatibility as well as the benefits of moisture retention in the stratum corneum. Honey is a moisture regulator and significantly prolongs the activity of other moisturizing factors. It prevents water loss from the skin without the occlusion effect. As a result, the skin stays elastic, velvety and radiantly fresh for much longer.

HOPS

INCI: HOPS EXTRACT

Is extracted from the flowers and young hop shoots and has a soothing and balancing effect.

HORSE CHESTNUT EXTRACT

INCI: HORSE CHESTNUT EXTRACT

The blood circulation promoting extract of horse chestnut is used to care for sensitive, reddened skin as well as for rosacea. The blossoms and seeds are harvested for medicinal purposes. They are carefully processed to preserve the circulation promoting agents as esculin, rutin, quercetin, flavone, triterpene saponin, adenosine, as well as bitter substances. These specific agents accelerate the blood flow, strengthen the veins and reduce vein wall permeability, relieve congestive edema and blood stasis, dehydrate tissue, reverse swelling, acts anti-inflammatory, haemostatic and increase the tonus of the vein wall.

HYALURONIC ACID

INCI: SODIUM HYALURONATE

Hyaluronic acid is a biotechnological product. Low molecular weight hyaluronic acid is used to reach into the deeper layers of the skin. High molecular weight is used to achieve a hygroscopic effect on the outer layers of skin. In connection with water, hyaluronic acid creates a viscoelastic, non-sticky, and invisible film that regulates the skin's moisture balance. This powerful moisture binding effect causes the skin to appear much smoother and fuller.

DECLARATION OF MAIN INGREDIENTS

HYDRACTIN[®] - ACTIVE SUBSTANCE COMPLEX

INCI: DISODIUM ADENOSINE TRIPHOSPHATE, CARICA PAPAYA FRUIT EXTRACT, UREA, ALGIN

Stimulates the cell's energy production and improves cell metabolism. The hydro-lipid coating is rebuilt. Trans-epidermal water loss is reduced creating an excellent moisturizing effect. Skin regeneration and elasticity is promoted.

HYDROXYECTOIN

INCI: HYDROXYECTOIN

A highly effective anti-pollution agent that offers exceptionally high levels of cell protection and restores damaged skin barriers. This active ingredient complex prevents skin ageing caused by UV rays and protects the skin from environmental stressors.

I

INCENSE

INCI: BOSWELLIA SERRATA EXTRACT

"Holy Incense" is the air-dried resin from the frankincense tree. Protects and acts anti-irritating, anti-inflammatory and antiseptic.

K

KARANJAOIL

INCI: TITANDIOXID

Responsible for providing mineral sun protection, natural oil extracted from the seeds of the Karanja tree. It also has anti-bacterial and anti-inflammatory properties.

L

LACTIC

INCI: LACTIC ACID

Is found in the hydro-lipid film of the skin, where it helps stabilize of the protective acid mantle, binds moisture and controls the keratinization of the epidermis. Since lactic acid is pH-regulating, it can inhibit the growth of foreign microorganisms on the skin. Lactic acid is generally an excellent skin moisturizer and moisture binder. Higher concentration of lactic acid are used as gentle skin surface peels and in cleaning and care products for blemished and acne-prone skin by reducing the keratinized cells and extracting comedones.

LINDE FLOWER EXTRACT

INCI: TILIA CORDATA EXTRACT

DECLARATION OF MAIN INGREDIENTS

Achieves smooth surface skin by the reduction of roughness and irregularities. Shields against the harmful effects of external influences and lends the skin a pleasant freshness. It's astringent, soothing effect is particularly beneficial for sensitive skin.

LICORICE

INCI: DIPOTASSIUM GLYCYRRHIZATE

An irritation calming agent that counteracts inflammation.

LYSINE

INCI: LYSINE

Accelerates active ingredients and stabilizes PH levels with a moisture retaining effect.

M

MATRYXIL / MATRYXIL 3000

INCI: PALMITOYL TETRAPEPTIDE-3 / -7

A biomimetic synthetically produced peptide developed to promote collagen production and thereby strengthen the basic structure of skin tissue. Stimulates collagen synthesis and reconstructs the intercellular cross-linked network of supporting collagenous and elastin fibers. The functionality of the epidermis is restored. With regular use, a demonstrable and visible reduction in wrinkle depth, density and volume can be observed.

MATRIXYL[®]SYNTHÉ'6

INCI: GLYCERIN, AQUA, HYDROXYPROPYL CYCLODEXTRIN UND PALMITOYL
TRIPETIDE-38

Matrixyl[®]synthe'6 is based on a tripeptide which is able to stimulate the synthesis of the six main blocks of the dermal matrix (collagen I, III, IV, fibronectin, laminin and hyaluronic acid-5). Smoothens the shape of the skin and lifts wrinkles from the inside.

MICRONIZED SILVER

INCI: SILVER

Colloidal silver is derived from ultrafine particles of elemental silver, which produces an antimicrobial effect on the skin and deactivates low concentrations of certain bacteria and fungi. It is the perfect skin care base for a very blemished complexion. The aim is to relieve the skin of excessive bacterial colonization. The cosmetic ingredient silver helps balance

DECLARATION OF MAIN INGREDIENTS

moisture content, relieve redness and contribute to the regeneration of damaged skin cells.
Helps prohibit new inflammatory processes.

N

NEUTRAZEN™ - BIOMIMETIC LIPOPETID

INCI: PALMITOYL TRIPEPTIDE-8

The term 'biomimetic' means to imitate a biological process or function. Neutrazen™ prevents and reverses signs of neurogenic inflammation, calms & soothes irritated skin and helps to maintain and restore a normal skin sensitivity threshold.

O

OPC - GRAPE SEED OIL / EXTRACT

INCI: VITIS VINIFERA (GRAPE) SEED EXTRACT

Is a natural oil pressed from grape seeds with up to 96% unsaturated fatty acids. Processed and technically refined to preserve all of the available A, E and B6 vitamins. The percentage of oil in the seeds varies from 6 to 20%, with a remarkable proportion of essential (vital) linoleic acid (up to 71%), which must be supplied nutritionally. Improves general condition and ensures the promotion of healthy and beautiful skin.

P

PANTHENOL

INCI: PANTHENOL

Belongs to the vitamin B group that is found in yeast, vegetables, grains, peanuts, liver, etc. It plays an important part in the keratinization of the epidermis, hair and nails. Panthenol supports the cell renewal of the skin, promotes healing and acts against inflammation. For a velvety skin, panthenol is used against skin irritations as well as a relief of mild sunburn.

PEPTIDE COMPLEX

INCI: CAPROOYL TETRAPEPTIDE-3

The peptide complex is a tripeptide, esterified with fatty acids that improves the immune capacity of the skin. Increases the moisture content, activates improved collagen formation and swiftly penetrates deep into the skin. This active ingredient promotes elasticity, immune defenses and healthy skin radiance.

DECLARATION OF MAIN INGREDIENTS

PLANT TENSIDE

INCI: LAUROYL SARCOSINATE

Acts as a very gentle skin cleansing agent.

PHYTODERMINA H LIFTING

INCI: HYDROXYPROPYL CYCLODEXTRIN

Phytodermina H Lifting assists to improve the skin surface, smoothens wrinkles and hereby provides new expressiveness. Phytodermina H Lifting contains Hydroxypropyl-beta-cyclodextrin (circular oligosaccharide). It's produced by an enzymatic splitting of starch. This substance is a biotechnical product which makes minimizing or blocking of basis-smell or – taste possible.

PHYTOSAN

INCI: COMPOSED OF: GLYCINE SOJA (SOYBEAN) SEED EXTRACT

Phytosan is a vegetable substance extracted from soy proteins. The extract acts decisively against the skin's aging process and allows (the construction of) a length-optimal synthesis of active substances. Reactivates collagen and elastin synthesis. Wrinkle depth is significantly reduced making the skin look smoother and younger.

PROVITAMIN B5

INCI: DEXPANTHENOL

Provitamine B5 increases the ability of the skin containing moisture and has nurturing characteristics to improve the elasticity. It supports the re-creation of skin cells and hereby assists the regeneration. Moreover, Dexpanthenol has itchininess easing, anti-inflammatory and wound healing abilities.

S

SALICYLIC ACID

INCI: SALICYLIC ACID

Salicylic acid is a naturally occurring plant substance with antimicrobial, analgesic and anti-inflammatory qualities. The active ingredient salicylic acid is recommended against various impurities and acne prone skin. The acid gently peels off the dead skin cells (keratolysis). The skin is oxygenated, looks smoother, and cornification disorders are eliminated. Salicylic acid has anti-inflammatory and slight antimicrobial activity against a variety of bacteria and fungi. Inhibits the development of microorganisms on the skin.

DECLARATION OF MAIN INGREDIENTS

SEBOCLEAR

INCI: MAHONIA AQUIFOLIUM ROOT EXTRACT / PLANTAGO LANCEOLATA (LEAF) EXTRACT

The active substances contained in the leaves of Mahonia aquifolium (Mahonia) and the roots of Plantago lanceolata (ribwort plantain) actively support sebum regulation and have anti-inflammatory and anti-bacterial effects.

SODIUM BICARBONAT

INCI: SODIUM BICARBONATE

Also known as sodium carbonate. Is an excellent pH regulator and balances the skin's pH level (5,5).

SODIUM PCA

INCI: SODIUM PCA

Moisture retention molecules are part of the NMF (natural moisturizing factor). Sodium PCA are amino acids that are also natural skin components with high water-binding properties partially responsible for the ability of the skin to store water/moisture providing hydrated suppleness.

SUNFLOWER OIL

INCI: HELIANTHUS ANNUS SEED OIL

Highly recommended oil component containing unsaturated fatty acids (oleic acid, linoleic acid) and vitamin E. with smoothing, protective and moisturizing properties. Delivers auxins, a plant hormone, known to delay premature skin aging.

SQUALANE

INCI: SQUALANE

Unsaturated fatty acid that is extracted from olives. It leaves the skin feeling pleasant and evens out the skin's hydrolipidic layer.

SYN[®]-AKE

INCI: DIPEPTIDE DIAMINO BUTYROYL BENZYLAMIDE DIACETATE

A synthetic version of a polypeptide fraction found in the venom of the temple viper (Tropidolaemus Wagleri). The synthetically produced anti-wrinkle ingredient is based on the same muscle relaxing effect as the original venom. The native snake venom protein, consisting of a long chain molecule, is too large to permeate the skin. The effect itself is

DECLARATION OF MAIN INGREDIENTS

spliced onto a smaller effective tripeptide molecule that is pliable for skin care products. Producing reduced muscle contraction and smooth facial lines within a short period of time.

SYN®-HYCAN

INCI: TETRADECYL AMINOBUTYROYL-VALYLAMINOBUTYRIC UREA
TRIFLUOROACETATE

SYN®-HYCAN is a patented, synthetic tri-peptide. It contains no preservatives. By SYN®-HYCAN, the body owned production of hyaluronic acid and collagen can be increased and improved essentially. The skin can look younger, healthy and smoother.

V

VITAMIN E

INCI: TOCOPHEROL

Tocopherol is a fat-soluble vitamin that has outstanding cosmetic properties and is extremely anti-oxidative and skin conditioning. Tocopherol improves skin moisture and can even eliminate fine wrinkles. Also used as a natural sunscreen, protecting against premature skin aging. Vitamin E promotes healing and reduces inflammation.

W

WHEAT GERM OIL

INCI: TRITICUM VULGARE (WHEAT) GERM OIL

Wheat germ oil is extracted from the germ of the wheat kernel, creating a low viscosity, golden-yellow oil. It is particularly high in quality plant lecithin, vitamin E (255 mg/100g) and pro-vitamins A and D. The blood circulation of the skin tissue is promoted. Dry, rough skin becomes supple and velvety.
